Dyslexia, Dyspraxia and Mathematics Dorian Yeo

Written by a teacher with many years' experience of teaching mathematics to primary school dyslexic and dyspraxic children with a wide range of abilities, this book is designed to be a practical teaching guide. It offers detailed guidance and specific teaching suggestions to all specialist teachers, support teachers, classroom teachers and parents who either directly teach mathematics to dyslexic and dyspraxic children or who support the mathematics teaching programmes of dyslexic or dyspraxic children.

Although the book has grown out of teaching experience it is also informed by widely acknowledged contemporary and international research, which explores the cognitive aspects of learning mathematics and tries to understand why it is that some children fail to learn mathematics.

Many of the teaching principles described in the text have specific and quite far-reaching implications. The theoretical arguments should therefore also be of interest to special needs co-ordinators, heads of maths departments, head teachers or other professionals who are responsible for designing or modifying the maths learning programmes of children with special learning and maths difficulties. In more general terms, the book hopes to contribute to the broad discussion of the cognitive features and educational needs of dyslexic and dyspraxic children.

Chantal Dow:

Can you one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you just dont know the inside because don't evaluate book by its cover may doesn't work here is difficult job because you are scared that the inside maybe not as fantastic as in the outside appear likes. Maybe you answer can be Dyslexia, Dyspraxia and Mathematics why because the wonderful cover that make you consider about the content will not disappoint an individual. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly assist you to pick up this book.

Cynthia Olson:

As a scholar exactly feel bored to help reading. If their teacher inquired them to go to the library as well as to make summary for some e-book, they are complained. Just very little students that has reading's soul or real their pastime. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Dyslexia, Dyspraxia and Mathematics can make you feel more interested to read.
