## **Charged Particle Traps: Physics and Techniques of Charged Particle Field Confinement (Springer Series on Atomic, Optical, and Plasma Physics)** F. G. Major, Viorica N. Gheorghe, Günther Werth

Over the last quarter of this century, revolutionary advances have been made both in kind and in precision in the application of particle traps to the study of the physics of charged particles, leading to intensified interest in, and wide proliferation of, this topic. This book is intended as a timely addition to the literature, providing a systematic unified treatment of the subject, from the point of view of the application of these devices to fundamental atomic and particle physics.

The technique of using electromagnetic fields to confine and isolate atomic particles in vacuo, rather than by material walls of a container, was initially

conceived by W. Pauli in the form of a 3D version of the original rf quadrupole mass filter, for which he shared the 1989 Nobel Prize in physics [1], whereas H.G. Dehmelt who also shared the 1989 Nobel Prize [2] saw these devices (including the Penning trap) as a way of isolating electrons and ions, for the purposes of high resolution spectroscopy. These two broad areas of application have developed more or less independently, each attaining a remarkable degree of sophistication and generating widespread interest and experimental activity.

**From reader reviews:**

**Jean Fuller:**

The actual book Charged Particle Traps: Physics and Techniques of Charged Particle Field Confinement (Springer Series on Atomic, Optical, and Plasma Physics) has a lot of knowledge on it. So when you check out this book you can get a lot of profit. The book was compiled by the very famous author. The writer makes some research previous to write this book. This particular book very easy to read you can get the point easily after scanning this book.

**Sharon Hall:**

Beside this specific Charged Particle Traps: Physics and Techniques of Charged Particle Field Confinement (Springer Series on Atomic, Optical, and Plasma Physics) in your phone, it could possibly give you a way to get closer to the new knowledge or information. The information and the knowledge you are going to get here is fresh from oven so don't possibly be worry if you feel like an outdated people live in narrow town. It is good thing to have Charged Particle Traps: Physics and Techniques of Charged Particle Field Confinement (Springer Series on Atomic, Optical, and Plasma Physics) because this book offers to your account readable information. Do you often have book but you don't get what it's exactly about. Oh come on, that would not happen if you have this in your hand. The Enjoyable option here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss the idea? Find this book in addition to read it from right now!

**Marilyn Perez:**

Don't be worry if you are afraid that this book will filled the space in your house, you might have it in e-book means, more simple and reachable. This kind of Charged Particle Traps: Physics and Techniques of Charged Particle Field Confinement (Springer Series on Atomic, Optical, and Plasma Physics) can give you a lot of pals because by you checking out this one book you have thing that they don't and make a person more like an interesting person. This particular book can be one of a step for you to get success. This publication offer you information that possibly your friend doesn't learn, by knowing more than additional make you to be great men and women. So , why hesitate? Let us have Charged Particle Traps: Physics and Techniques of Charged Particle Field Confinement (Springer Series on Atomic, Optical, and Plasma Physics).

**Jaime McKenney:**

As we know that book is significant thing to add our understanding for everything. By a reserve we can know everything you want. A book is a group of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This reserve Charged Particle Traps: Physics and Techniques of Charged Particle Field Confinement (Springer Series on Atomic, Optical, and Plasma Physics) was filled regarding science. Spend your extra time to add your knowledge about your science competence. Some people has

various feel when they reading any book. If you know how big benefit of a book, you can experience enjoy to read a book. In the modern era like now, many ways to get book that you wanted.
