The Global 1989: Continuity and Change in World Politics

The Global 1989: Continuity and Change in World Politics

1989 signifies the collapse of Soviet communism and the end of the Cold War, a moment generally recognized as a triumph for liberal democracy and when capitalism became global. The Global 1989 challenges these ideas. An international group of prominent scholars investigate the mixed, paradoxical and even contradictory outcomes engendered by these events, unraveling the intricacies of this important moment in world history. Although the political, economic and cultural orders generated have, for the most part, been an improvement on what was in place before, this has not always been clear cut: 1989 has many meanings, many effects and multiple trajectories. This volume leads the way in defining how 1989 can be assessed both in terms of its world historical impact and in terms of its contribution to the shape of contemporary world politics.
