Regenerative Design Techniques: Practical Applications in Landscape Design

Pete Melby, Tom Cathcart

Regenerative Design Techniques: Practical Applications in Landscape Design Pete Melby, Tom Cathcart

A hands-on resource for applying regenerative design technologies Regenerative Design Techniques provides practical and applied information on sustainable and regenerative principles, as well as techniques for analyzing and implementing these principles into the design of a structure or site. Written in a clear and accessible style, this book enables readers to easily and immediately apply all the material presented. Environmental concerns that affect design are covered, along with issues such as water and waste, as well as information on energy and shelter. Specific topics examined within these broad issues include: Water quality, harvesting, runoff, and gray water Solid waste, recycling, reuse, and treatment Heat transfer, solar energy, and sun control Foundations, greenhouses, and indoor air quality Shelter design using overhangs and passive heating And many more Complete with a companion Web site (www.wiley.com/go/melby) providing supplemental images, text, calculations, and additional resources, Regenerative Design Techniques is an invaluable resource to landscape architects, architects, environmental engineers, planners, and civil engineers, as well as students in these disciplines.

From reader reviews:

Desiree Thorne:

In this 21st millennium, people become competitive in every way. By being competitive at this point, people have to do something to make themselves survive, being in the middle of the actual crowded place and noticed by means of surrounding. One thing that occasionally many people have underestimated that for a while is reading. That's why, by reading a publication your ability to survive rises then having a chance to stand up than others is high. To suit your needs who want to start reading a book, we give you this Regenerative Design Techniques: Practical Applications in Landscape Design book as a beginner and daily reading publication. Why, because this book is usually more than just a book.

Georgetta Watson:

This book titled Regenerative Design Techniques: Practical Applications in Landscape Design to be one of several books this best seller in this year, here is because when you read this review you can get a lot of benefit from it. You will easily buy this particular book in the book retail outlet or you can order it by means of online. The publisher of the book sells the e-book too. It makes it easier to read this book, as you can read this book in your mobile phone. So there is no reason for you to pass this book from your list.

Violet Iverson:

Your reading sixth sense will not betray a person, why because this Regenerative Design Techniques: Practical Applications in Landscape Design book written by a well-known writer who really knows well how to make a book that can be understood by anyone who has read the book. Written in a good manner for you, still dripping with every idea and producing skill only to eliminate your current hunger then you still have hesitation. Regenerative Design Techniques: Practical Applications in Landscape Design is a good book but not only by the cover but also from the content. This is one guide that can break don't evaluate a book by its include, so do you still need a different sixth sense to pick that!? Oh come on your reading through sixth sense already told you so why you have to listen to another sixth sense.

Eric Kinlaw:

A lot of guides have been printed but it takes a different approach. You can get it by web on social media. You can choose the best book for you, science, comedian, novel, or whatever by means of searching for it. It is named the book Regenerative Design Techniques: Practical Applications in Landscape Design. You can include your knowledge by it. Without leaving behind the printed book, it can add your knowledge and make an individual happier to read. It is most significant that you must be aware about publication. It can bring you from one location to another place.
