Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications Steven Franklin

The Latest Advances in Remote Sensing for Biodiversity

This state-of-the-art volume provides fundamental information on and practical applications of remote sensing technologies in wildlife management, habitat studies, and biodiversity assessment and monitoring. The book reviews image analysis, interpretation techniques, and key geospatial tools, including field-based, aerial, and satellite remote sensing, GIS, GPS, and spatial modeling.

Remote Sensing for Biodiversity and Wildlife Management emphasizes transdisciplinary collaboration, technological innovations, and new applications in this emerging field. Landmark case studies and illustrative examples of best practices in biodiversity and wildlife management remote sensing at multiple scales are featured in this pioneering work.

COVERAGE INCLUDES:

- Management information requirements
- Geospatial data collection and processing
- Thermal, passive and active microwave, and passive and active optical sensing
- Integrated remote sensing, GIS, GPS, and spatial models
- Remote sensing of ecosystem process and structure
- Proven methods for acquiring, interpreting, and analyzing remotely sensed data
- Habitat suitability and quality analysis
- Mapping anthropogenic disturbances and modeling species distribution
- Biodiversity indicators, including species richness mapping and productivity modeling
- Habitat quality and dynamics
- Indicators and processes
- Invasive alien species
- Species prediction models
- Food and resources
- Biodiversity monitoring
- Fragmentation and spatial heterogeneity

From reader reviews:

John Ward:

Do you one of people who can't read pleasurable if the sentence chained in the straightway, hold on guys this specific aren't like that. This Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications book is readable by simply you who hate the perfect word style. You will find the facts here are arrange for enjoyable looking at experience without leaving actually decrease the knowledge that want to offer to you. The writer regarding Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications content conveys thinking easily to understand by most people. The printed and e-book are not different in the information but it just different by means of it. So , do you continue to thinking Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications is not loveable to be your top collection reading book?

Carol Wells:

Reading can called mind hangout, why? Because when you find yourself reading a book mainly book entitled Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications your mind will drift away trough every dimension, wandering in every aspect that maybe not known for but surely will become your mind friends. Imaging every single word written in a reserve then become one application form conclusion and explanation this maybe you never get before. The Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications giving you another experience more than blown away your mind but also giving you useful data for your better life within this era. So now let us present to you the relaxing pattern at this point is your body and mind will probably be pleased when you are finished reading through it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

Ann Lang:

The book untitled Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications contain a lot of information on the item. The writer explains her idea with easy method. The language is very straightforward all the people, so do not worry, you can easy to read the item. The book was written by famous author. The author will take you in the new era of literary works. It is possible to read this book because you can read more your smart phone, or product, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can open up their official web-site along with order it. Have a nice examine.

Mary Scruggs:

Book is one of source of know-how. We can add our know-how from it. Not only for students but also native or citizen need book to know the revise information of year for you to year. As we know those books have many advantages. Beside we all add our knowledge, can also bring us to around the world. From the book Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications we can acquire

more advantage. Don't that you be creative people? Being creative person must love to read a book. Simply choose the best book that acceptable with your aim. Don't become doubt to change your life by this book Remote Sensing for Biodiversity and Wildlife Management: Synthesis and Applications. You can more desirable than now.
