People and Computers XVI - Memorable Yet Invisible: Proceedings of HCI 2002

For the last 20 years the dominant form of user interface has been the Graphical User Interface (GUl) with direct manipulation. As software gets more complicated and more and more inexperienced users come into contact with computers, enticed by the World Wide Web and smaller mobile devices, new interface metaphors are required. The increasing complexity of software has introduced more options to the user. This seemingly increased control actually decreases control as the number of options and features available to them overwhelms the users and 'information overload' can occur (Lachman, 1997). Conversational anthropomorphic interfaces provide a possible alternative to the direct manipulation metaphor. The aim of this paper is to investigate users reactions and assumptions when interacting with anthropomorphic agents. Here we consider how the level of anthropomorphism exhibited by the character and the level of interaction affects these assumptions. We compared characters of different levels of anthropomorphic abstraction, from a very abstract character to a realistic yet not human character. As more software is released for general use with anthropomorphic interfaces there seems to be no consensus of what the characters should look like and what look is more suited for different applications. Some software and research opts for realistic looking characters (for example, Haptek Inc., see http://www.haptek.com). others opt for cartoon characters (Microsoft, 1999) others opt for floating heads (Dohi & Ishizuka, 1997; Takama & Ishizuka, 1998; Koda, 1996; Koda & Maes, 1996a; Koda & Maes, 1996b).

From reader reviews:

Luis Acosta:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As we know that book is very important for all of us. The book People and Computers XVI - Memorable Yet Invisible: Proceedings of HCI 2002 ended up being making you to know about other know-how and of course you can take more information. It is quite advantages for you. The book People and Computers XVI - Memorable Yet Invisible: Proceedings of HCI 2002 is not only giving you far more new information but also to become your friend when you sense bored. You can spend your own spend time to read your e-book. Try to make relationship together with the book People and Computers XVI - Memorable Yet Invisible: Proceedings of HCI 2002. You never feel lose out for everything if you read some books.

Rodney Alvarez:

Now a day individuals who Living in the era just where everything reachable by talk with the internet and the resources inside it can be true or not demand people to be aware of each data they get. How individuals to be smart in getting any information nowadays? Of course the reply is reading a book. Studying a book can help individuals out of this uncertainty Information specially this People and Computers XVI - Memorable Yet Invisible: Proceedings of HCI 2002 book because book offers you rich data and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it as you know.

Sally McGarvey:

Nowadays reading books be a little more than want or need but also work as a life style. This reading practice give you lot of advantages. Associate programs you got of course the knowledge your information inside the book that improve your knowledge and information. The information you get based on what kind of e-book you read, if you want drive more knowledge just go with training books but if you want really feel happy read one together with theme for entertaining for instance comic or novel. The actual People and Computers XVI - Memorable Yet Invisible: Proceedings of HCI 2002 is kind of guide which is giving the reader unstable experience.

Charles Sizemore:

Reading a book being new life style in this calendar year; every people loves to read a book. When you examine a book you can get a lots of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this kind of us novel, comics, and soon. The People and Computers XVI - Memorable Yet Invisible: Proceedings of HCI 2002 provide you with a new experience in reading a book.
