## Meyer And Van Schooten Architects

The architecture of Meyer and van Schooten stands out for its inventive and innovative use of detailing, for its formal elegance and its bold gestures. Behind and within the seductive forms of their architecture there are myriad subtleties, not only in the details, but also in the spaciousness, the use of materials, and the angularity and stratification of the shell. Meyer and van Schooten seamlessly integrate form, function, and technology into a dynamic architecture that appeals directly to the senses. For the past two decades, Meyer and van Schooten have designed projects ranging from housing to bridges, from reconstructions of historic buildings to international corporate headquarters. This monograph will be the first published on their output.
