Wireless Networking for Moving Objects: Protocols, Architectures, Tools, Services and Applications (Lecture Notes in Computer Science)

Wireless Networking for Moving Objects: Protocols, Architectures, Tools, Services and Applications (Lecture Notes in Computer Science)

Wireless networks of moving objects have drawn significant attention recently. These types of networks consist of a number of autonomous or semi-autonomous wireless nodes/objects moving with diverse patterns and speeds while communicating via several radio interfaces simultaneously. To overcome current shortcomings, a number of research challenges have to be addressed in this area, ranging from initial conceptualization and modelling, to protocols and architectures engineering, and development of suitable tools, applications and services, and to the elaboration of realistic use-case scenarios by taking into account corresponding societal and economic aspects. By applying a systematic approach the objective of this book is to assess the state of the art and consolidate the main research results achieved in this area. It was prepared as the Final Publication of the COST Action IC0906 “Wireless Networking for Moving Objects (WiNeMO)”. The book contains 15 chapters and is a show-case of the main outcomes of the action in line with its scientific goals. The book will serve as a valuable reference for undergraduate students, post-graduate students, educators, faculty members, researchers, engineers, and research strategists working in this field.

From reader reviews:

David Ramos:

The ability that you get from Wireless Networking for Moving Objects: Protocols, Architectures, Tools, Services and Applications (Lecture Notes in Computer Science) may be the more deep you digging the information that hide inside words the more you get interested in reading it. It does not mean that this book is hard to comprehend but Wireless Networking for Moving Objects: Protocols, Architectures, Tools, Services and Applications (Lecture Notes in Computer Science) giving you excitement feeling of reading. The writer conveys their point in specific way that can be understood by anyone who read this because the author of this publication is well-known enough. This specific book also makes your current vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this Wireless Networking for Moving Objects: Protocols, Architectures, Tools, Services and Applications (Lecture Notes in Computer Science) instantly.

John McGinnis:

Spent a free a chance to be fun activity to do! A lot of people spent their spare time with their family, or their particular friends. Usually they performing activity like watching television, about to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Might be reading a book might be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the book untitled Wireless Networking for Moving Objects: Protocols, Architectures, Tools, Services and Applications (Lecture Notes in Computer Science) can be very good book to read. May be it can be best activity to you.

Allen Grimm:

Precisely why? Because this Wireless Networking for Moving Objects: Protocols, Architectures, Tools, Services and Applications (Lecture Notes in Computer Science) is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will shock you with the secret it inside. Reading this book close to it was fantastic author who also write the book in such wonderful way makes the content on the inside easier to understand, entertaining technique but still convey the meaning completely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This amazing book will give you a lot of gains than the other book possess such as help improving your expertise and your critical thinking method. So , still want to hesitate having that book? If I were being you I will go to the book store hurriedly.

Betty Peoples:

What is your hobby? Have you heard that will question when you got pupils? We believe that that issue was given by teacher to their students. Many kinds of hobby, All people has different hobby. So you know that

little person like reading or as looking at become their hobby. You need to understand that reading is very important and book as to be the factor. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You discover good news or update concerning something by book. Numerous books that can you choose to use be your object. One of them is niagra Wireless Networking for Moving Objects: Protocols, Architectures, Tools, Services and Applications (Lecture Notes in Computer Science).
