Unmanned Rotorcraft Systems (Advances in Industrial Control) Guowei Cai, Ben M. Chen, Tong Heng Lee

Unmanned Rotorcraft Systems explores the research and development of fully-functional miniature UAV (unmanned aerial vehicle) rotorcraft, and provides a complete treatment of the design of autonomous miniature rotorcraft UAVs. The unmanned system is an integration of advanced technologies developed in communications, computing, and control areas, and is an excellent testing ground for trialing and implementing modern control techniques. Included are detailed expositions of systematic hardware construction, software systems integration, aerodynamic modeling; and automatic flight control system design.

Emphasis is placed on the cooperative control and flight formation of multiple UAVs, vision-based ground target tracking, and landing on moving platforms. Other issues such as the development of GPS-less indoor micro aerial vehicles and vision-based navigation are also discussed in depth: utilizing the vision-based system for accomplishing ground target tracking, attacking and landing, cooperative control and flight formation of multiple unmanned rotorcraft; and future research directions on the related areas.

From reader reviews:

Kathy Wilson:

Inside other case, little individuals like to read book Unmanned Rotorcraft Systems (Advances in Industrial Control). You can choose the best book if you want reading a book. As long as we know about how is important some sort of book Unmanned Rotorcraft Systems (Advances in Industrial Control). You can add expertise and of course you can around the world by just a book. Absolutely right, since from book you can know everything! From your country right up until foreign or abroad you will end up known. About simple issue until wonderful thing you can know that. In this era, we can easily open a book as well as searching by internet system. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's learn.

Myrtle Hamer:

As people who live in typically the modest era should be up-date about what going on or info even knowledge to make these people keep up with the era that is always change and move forward. Some of you maybe will update themselves by looking at books. It is a good choice for you personally but the problems coming to you actually is you don't know which one you should start with. This Unmanned Rotorcraft Systems (Advances in Industrial Control) is our recommendation to make you keep up with the world. Why, as this book serves what you want and need in this era.

Ann Ginsberg:

The reason? Because this Unmanned Rotorcraft Systems (Advances in Industrial Control) is an unordinary book that the inside of the book waiting for you to snap the item but latter it will shock you with the secret it inside. Reading this book next to it was fantastic author who have write the book in such remarkable way makes the content within easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you because of not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of gains than the other book have such as help improving your skill and your critical thinking way. So , still want to delay having that book? If I had been you I will go to the e-book store hurriedly.

Stacy Abercrombie:

A number of people said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half elements of the book. You can choose typically the book Unmanned Rotorcraft Systems (Advances in Industrial Control) to make your own personal reading is interesting. Your own personal skill of reading expertise is developing when you similar to reading. Try to choose very simple book to make you enjoy to see it and mingle the feeling about book and reading through especially. It is to be 1st opinion for you to like to open a book and read it. Beside that the guide Unmanned Rotorcraft Systems (Advances in Industrial Control) can to be your brand-new friend when you're experience alone and confuse using what

must you're doing of that time.
