Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) Helmut Traitler, Birgit Coleman, Karen Hofmann

Food products have always been designed, but usually not consciously. Even when design has been part of the process, it has often been restricted to considerations of packaging, logos, fonts and colors.

But now design is impacting more dramatically on the complex web that makes up our food supply, and beginning to make it better. Ways of thinking about design have broad applications and are becoming central to how companies compete. To succeed, food designers need to understand consumers and envision what they want, and to use technology and systems to show they can deliver what has been envisioned. They also need to understand organizations in order to make innovation happen in a corporation.

The authors of this book argue that design has been grossly underestimated in the food industry. The role of design in relation to technology of every kind (materials, mechanics, ingredients, conversion, transformation, etc.) is described, discussed, challenged and put into proper perspective. The authors deftly analyze and synthesize complex concepts, inspiring new ideas and practices through real-world examples. The second part of the book emphasizes the role of innovation and how the elements described and discussed in the first parts (design, technology, business) must join forces in order to drive valuable innovation in complex organizations such as large (and not so large) food companies.

Ultimately, this groundbreaking book champions the implementation of a design role in defining and executing business strategies and business processes. Not only are designers tremendously important to the present and future successes of food corporations, but they should play an active and decisive role at the executive board level of any food company that strives for greater success.

From reader reviews:

Ernest Villa:

Hey guys, do you would like to finds a new book you just read? May be the book with the title Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) suitable to you? Often the book was written by renowned writer in this era. The actual book untitled Food Industry Design, Technology and Innovation (Institute of Food Technologists Series)is the main of several books which everyone read now. This book was inspired many people in the world. When you read this book you will enter the new shape that you ever know before. The author explained their concept in the simple way, thus all of people can easily to comprehend the core of this publication. This book will give you a wide range of information about this world now. In order to see the represented of the world with this book.

Carmen Flood:

Reading can called thoughts hangout, why? Because if you find yourself reading a book specifically book entitled Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) your head will drift away trough every dimension, wandering in each aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging every single word written in a book then become one application form conclusion and explanation which maybe you never get ahead of. The Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) giving you a different experience more than blown away your brain but also giving you useful info for your better life in this era. So now let us teach you the relaxing pattern at this point is your body and mind is going to be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary shelling out spare time activity?

Stephen Rael:

Within this era which is the greater particular person or who has ability in doing something more are more important than other. Do you want to become among it? It is just simple way to have that. What you have to do is just spending your time very little but quite enough to enjoy a look at some books. One of many books in the top record in your reading list is definitely Food Industry Design, Technology and Innovation (Institute of Food Technologists Series). This book and that is qualified as The Hungry Inclines can get you closer in becoming precious person. By looking upward and review this e-book you can get many advantages.

Bernard Kovach:

Book is one of source of knowledge. We can add our understanding from it. Not only for students but native or citizen need book to know the up-date information of year for you to year. As we know those publications have many advantages. Beside all of us add our knowledge, can also bring us to around the world. With the book Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) we can get more advantage. Don't one to be creative people? To get creative person must prefer to read a book. Just choose the best book that ideal with your aim. Don't always be doubt to change your life with this book Food

Industry Design, Technology and Innovation (Institute of Food Technologists Series). You can more desirable than now.
