Glacial Systems and Landforms: A Virtual Interactive Experience (Anthem Learning Geography)

Ryan C. Bell

This interactive guide serves to make glacial systems and landforms more accessible, as students use Google Earth and other satellite imagery to understand the patterns and processes found within glacial environments. Guided inquiry activities range from calculating the Mendenhall Glacier's rate of melting to identifying erosional landforms in the Swiss Alps. In this way, the guide offers a virtual interactive experience in which students can visit and explore glacial systems and landforms in 3D. Through studying these images the student will not only start to recognize the forms commonly found within glacial landscapes, but also develop skills in map analysis and interpretation.
